The Bicentennial National Trail is “a living trail” and as such conditions and access details are continually changing. Some of the information in the ‘update notes’ may have been provided by trekkers and may not have been verified on the ground by the section coordinator or a BNT Board member. Update notes are only a guide and situations can change from day to day, therefore you must try to contact the section coordinator and not rely solely on the guidebook or the update notes. You travel at your own risk as travelling on the BNT is regarded as self-reliant trekking. Note that these updates are to be used in conjunction with the guidebook identified above. Could all trekkers please send any information on track changes to the BNT office so the update notes can be as current as possible. Your notes need to be clear and concise. Please contact your local coordinator prior to trekking to advise of approximate travel dates and to obtain an update on local conditions.
